

COMMAND INPUT DEVICE COMBINABLE WITH PORTABLE COMMUNICATION APPARATUS

ABSTRACT OF THE DISCLOSURE

A command input device for use with a digital data processing system and a portable communication apparatus includes a signal connector and a command generator. The signal connector is detachably plugged to a socket of the portable communication apparatus. The command generator is electrically connected to the signal connector and asserts a command signal to the digital data processing system via local wireless transmission modules of the portable communication apparatus and the digital data processing system.
